March 2011

Dear Honorable Mayor Matthew T. Ryan,

I am pleased to provide the City of Binghamton Fire Department Annual Report for the year ending December 31<sup>st</sup>, 2010 for your consideration.

The Binghamton Fire Department responded to over 8200 emergency calls in 2010. There were two serious multiple alarm fires that involved a house fire on the north side of Binghamton and a five story multi-level building fire at the Midtown Mall in downtown Binghamton. On December 5<sup>th</sup>, 2010, the house fire at 534 State Street occurred in a large single family dwelling and before firefighters were on the scene three family members were overcome by smoke and died. The blaze was hard fought but the tragic ending remains. On December 21<sup>st</sup> 2010 at 9:35pm firefighters responded to a call at 17 Chenango Street and arrived to find a large landmark building that was quickly fully involved. The blaze was handled without injury or loss of the surrounding properties; the Press Building, the Perry Building and the rest of the entire city block. The Midtown Mall, which was in the process of being remodeled, suffered extensive damage.

The Fire Department accomplished several of its 2010 goals in conjunction with the City's goals for ensuring public safety. We continued to run an aggressive public education campaign and were diligent in city wide inspections. The Fire Department also conducted a week long Advanced Hazardous Materials Technician Course in October and provided our training facility and mobile fire trainer for joint training with mutual aid fire departments. We also secured additional thermal imaging cameras so that all fire companies now have them readily available to assist in rescue efforts. These actions align with our mission to continue to have our firefighters/medics in a constant state of readiness by keeping them well-trained and well-equipped so that they are ready to respond to emergency situations with as safe and successful an outcome as possible.

The Fire Department was awarded the FEMA Staffing for Adequate Fire and Emergency Response (SAFER) Grant which provides funding for eight new firefighter positions for 2011 and 2012. The Fire Department drove the grant proposal and complex navigation through this request which resulted in securing this substantial funding of over a million dollars. This grant news comes during a year when the local economic climate has been tenuous and budget cuts were mandated. This resulted in a very difficult decision to close a fire station – Engine Company 6 in the First Ward of the city. Workforce reductions were accomplished through attrition and creative staffing solutions. Further adjustments were made to assure the safety of our firefighters and citizens.

The Fire Department was actively involved in community events. We sponsored a 'shadowing experience' for the Binghamton University Leadership Class where they were exposed to the leadership techniques and styles used by the Fire Department. Once again, through their generosity, the Fire Department was the leader in donations for the City's annual United Way campaign. The Binghamton Firefighters Benevolent Association continues to be very active in the community raising funds for numerous local charities. This year they also hosted a very successful five day New York State Professional Firefighters Association Conference bringing hundreds of firefighters from around the state to enjoy our beautiful city.

I wish to extend my gratitude to the members of the BFD for their dedication and professionalism, which continues to be the trademark of the members of the Binghamton Fire Department. I would also like to thank the Mayor, City Council, the City management team, community service groups and local business for their support.

Daniel L. Thomas  
Binghamton Fire Chief

## *MISSION STATEMENT*

We will provide the “City of Binghamton” and its citizens with FIREFIGHTER/EMTs and FIREFIGHTER/PARAMEDICS trained to the highest and most progressive level of skill, to protect and serve our community with the utmost professionalism.

## **A FIREMAN'S PRAYER**

*When I am called to duty, God  
Wherever flames may rage,  
Give me strength to save some life  
Whatever be its age.  
Help me embrace a little child  
Before it is too late  
Or save an older person from  
The horror of that fate.  
Enable me to be alert and  
hear the weakest shout  
And quickly and efficiently  
To put the fire out.  
I want to fill my calling and  
To give the best in me,  
To guard every neighbor and  
Protect his property.*

**AMEN**

## **BRIEF HISTORY OF THE BINGHAMTON FIRE DEPARTMENT**

As with most of America's Fire Departments, Binghamton's began in 1834 as a volunteer organization. On May 3<sup>rd</sup> of that year, the trustees of the village voted to establish and organize fire and hook and ladder companies. By June 30<sup>th</sup>, sixteen citizens had accepted appointments. After a somewhat dubious beginning, the village purchased the first real piece of firefighting equipment in June of 1835. Eight hundred dollars was raised to purchase a small "button" hand powered fire engine. An additional \$250.00 was spent to buy land and erect an engine house on the present site of the Broome county Court House Square.

The Village of Binghamton continued to grow and consequently the fire load, necessitating the formation of additional volunteer companies. The loosely organized companies then began electing a Chief annually, with the first recorded Chief being Peter Miller elected in 1842. Two years after Binghamton obtained status as a City in 1867, The City of Binghamton Fire Department was formed under the leadership of Chief Erastus R. Campbell. On October 1, 1911 the Department became fully paid with a contingent of 91 officers and firefighters and with Charles N. Hogg as the Chief. The department continued to grow in size and modernized with motor driven apparatus. The horse drawn equipment was phased out by 1922. With the building of the station at 259 Conklin Avenue in 1929, the department reached its maximum size of 186 men operating nine engine companies, three truck companies and one heavy rescue company out of nine stations.

The department remained relatively unchanged until the late 1950s when the population began shifting to the rural areas of the county. Although the department began to downsize in relation to Binghamton's shrinking population, the scope of its operation expanded. In September of 1981 the ambulance was transferred from the Police Department to the Fire Department. In addition to providing ambulance service, a "First Responder" program was initiated. By having cross-trained firefighter/E.M.T.s responding from each station and in addition to the ambulance, medical assistance began reaching patients in approximately three minutes of the 911 call. To meet the growing needs of the City, the Hazardous Material Response Team began operations in May of 1988. In 1996, the EMS Program was upgraded to provide ALS level of service. Initially, twelve firefighters were trained as paramedics.

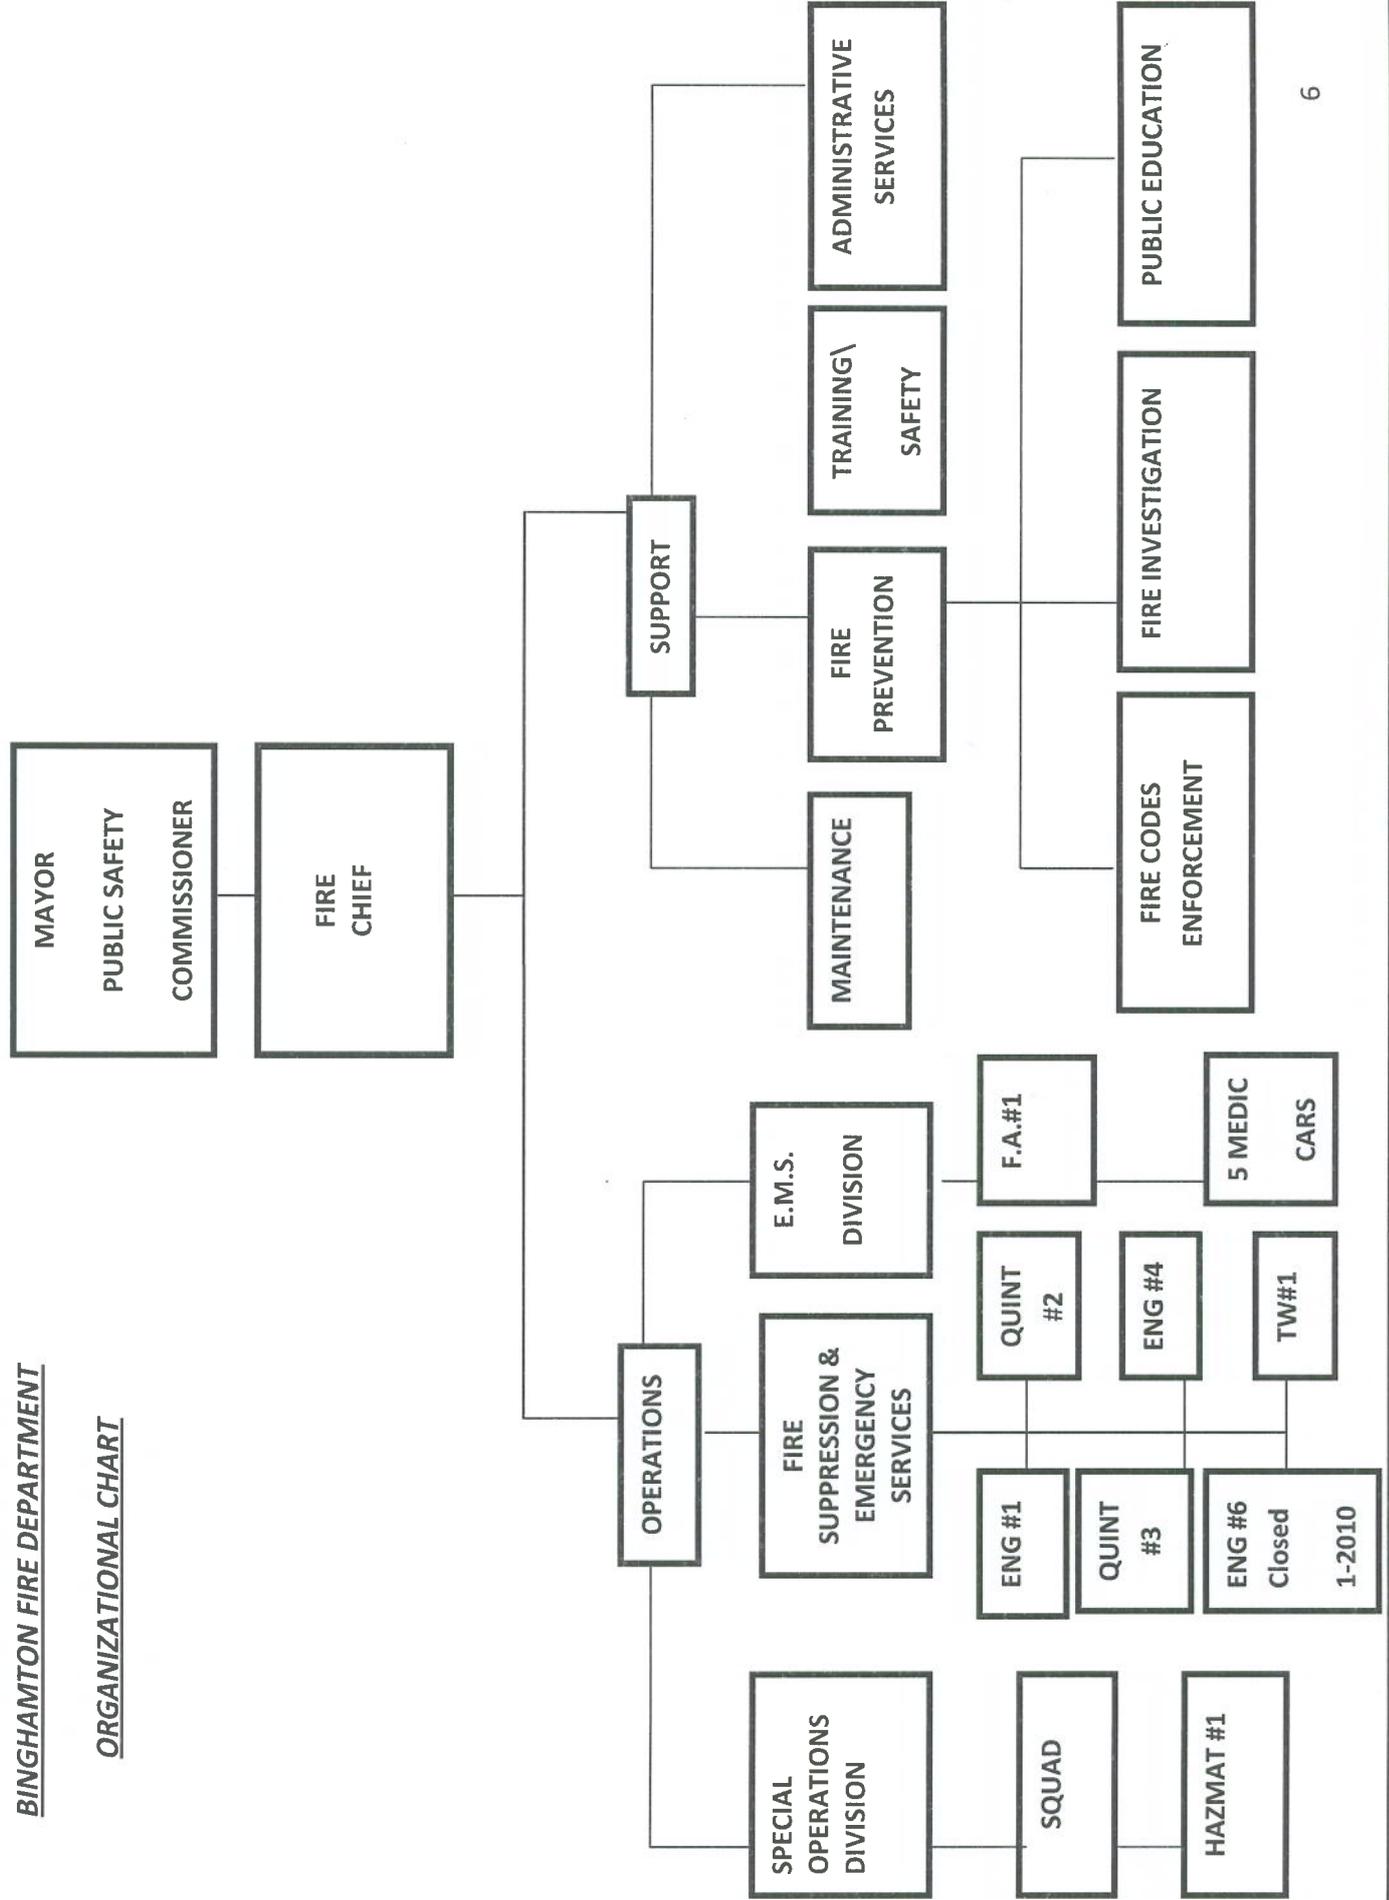

After almost thirty years of trying to develop a suitable training site, the Bureau was finally able to secure the necessary funding and property to realize this dream. The dedication was held on June 15, 2001 at 1 Belden St. The facility was named in honor of Training Instructor James Sullivan, who was killed in the line of duty on November 10, 1962.

Today's department has evolved into a modern multifaceted emergency response force providing firefighting, emergency medical services, hazardous materials and rescue coverage. If the emergency isn't directly to law enforcement, it is the Fire Department's job to provide assistance.

The "Mission Statement" developed by the firefighters demonstrates their enthusiasm and commitment in providing that most basic and important of all municipal responsibilities -- Public Safety. Since 1914 nineteen members have given their lives in the line of duty fulfilling this "Mission"

# SECTION TWO

## FIRE PREVENTION DIVISION

FIRE ADMINISTRATION  
38 HAWLEY ST.

# FIRE MARSHAL'S OFFICE

## 2010 REPORT

### 1. FIRE PREVENTION OFFICE

The Fire Prevention staff is comprised of the Fire Marshal, Assistant Fire Marshal, and two Fire Prevention Inspectors/Investigators. In our first full year working with one less inspector/investigator (position lost to budget constraints), all staff members adjusted to the increased work load and preformed admirably. Our mission is to educate the community about the benefits of proper safety practices, identify, and eliminate all types of hazardous conditions which pose a threat to life, the environment and property. The focus of our office is to protect the residents of the City of Binghamton by enforcing the Fire Code. We also strive to keep them safe by teaching Fire Prevention. In addition, the responsibility for the investigation of all fires falls on the members of the Fire Prevention staff. By year's end Fire Prevention conducted hundreds of inspections of various buildings in the City including but not limited to public & private schools, hospitals, churches, senior housing, senior centers, day care centers, hotels & places of public assemblies. All Fire Prevention officers attended numerous training classes and seminars throughout 2010 and by doing so retained their New York State required certification.

### 2. FIRE CODE COMPLIANCE

In 2010, we continued our expanded effort to achieve an increased degree of compliance with all City of Binghamton and N.Y. State mandated requirements, particularly **"life safety"** items (i.e., smoke detector, sprinkler & exiting requirements). The Fire prevention staff is the enforcement arm of the Fire Code and follows up on all inspections to be sure code compliance is met. In conjunction with the inspections conducted by the staff, the on line firefighters (Engine & Truck companies) also inspect commercial building in their response territory and thereby reduce and/or eliminate existing fire & life safety hazards. These inspections increase the "fire suppression" company's knowledge of the layout and construction of commercial buildings in their districts. This information

is crucial in assisting them in fire suppression tactics should a fire occur in that building. This updated information is also entered into our Red Alert software and available on the laptop computers in each fire truck & fire engine. Over 400, such inspections were conducted in 2010, resulting in the elimination of many “serious” hazardous conditions, which would, more than likely, have eventually caused structure fires. The objective for this office is to utilize our unique accessibility privilege to assure that New York State Fire Code compliance has been met and exceeded.

### **3. PUBLIC EDUCATION**

The Binghamton Fire Department (through the Fire Prevention office) provides numerous “Public Education” lectures throughout the year as a means of communicating beneficial fire safety information. Our live burn fire extinguisher simulator was used for employee training by numerous local industries this past year. The Fire Prevention personnel are assisted in this endeavor by line companies for demonstrations whenever possible. In addition to our normal school district program, additional lectures/demonstrations are presented by line officers on a voluntary basis. Over 70 of these presentations were given at schools, day-care centers, senior centers, community organizations, workplaces, hospitals, etc.

### **4. FIRE INVESTIGATIONS**

Among the varied and crucial functions of the Fire Prevention office, “Fire/Arson Investigations” are one of the top priorities. Every fire in the City of Binghamton, which is not of obvious cause, is referred to an officer from the Fire Marshal’s office (Fire Prevention). A complete and thorough investigation is then done to determine cause and origin. In 2010, sixty-three such investigations were completed resulting in multiple arson arrests. In addition, our office had two fatal fire investigations this year. All members of the Fire Prevention office are Level 2 fire investigators (highest level available in New York State) and were recertified in 2010. Our office works in conjunction with the Binghamton Police Department & District Attorney’s office to expose arsonists and put them in jail. While fire investigations are time consuming, low profile and sometimes dirty work, I am proud of the professionalism and dedication of the investigators in the Fire Prevention office.

## **5. ELIMINATION OF UNNECESSARY RESPONSE**

The continued efforts of Fire Prevention personnel to work with the owners and managers of establishments with defective or poorly designed alarm systems to upgrade and/or repair such systems has lowered unnecessary responses. Any decrease in unnecessary Fire Department response saves wear and tear on equipment and increases the availability of personnel and apparatus for legitimate requests for assistance.

## **6. SPECIAL NOTE**

The desired result of all Fire Prevention Programs is to protect and preserve life and property. Most, if not all fires are preventable. The Fire Department, as a whole, does not rest on the success of these mentioned accomplishments, but instead concentrates on any/all issues that affect the degree of life safety and security of the citizens of our community.

Daniel Eggleston  
Fire Marshal

# COMMENTS FROM THE ADULTS

Ms Heidi J McMenamin

Dear Rick and Dan,  
The class really enjoyed the "Smoke" house, hats and badges.  
Thanks, Mrs. M.

Dear Mr. Tucker,

Many thanks for wonderful presentation on fire safety in the home. I don't know what I have enjoyed a speaker so much. You were so down to earth and your easy going manner made all the information you gave us so easy to understand.

Again, thank you for your time. All of your efforts was sincerely appreciated.

Sincerely,  
First Ward Neighborhood Assembly  
Joel Overage, Secretary

# COMMENTS FROM THE KIDS

The Brighton Fire Department

We want to thank you all once again for your kind words and appreciation. You are all so brave and smart and we are so proud of you. Thank you for being so kind and helpful. From all of us here we say THANK YOU!

October 20, 2010

Dear firemen,

I enjoyed your visit to Roosevelt  
Thankyou for the smoke house. I  
liked the smoke.

From Aziz

**ACTIONS SPEAK LOUDER THAN WORDS**  
**CHILDREN ARE IN AWE OF OUR FIREFIGHTERS**

Thank you Lt. Tinder for helping us learn about fire safety!  
We had a good time too!

Mrs. Paolini's Class

**I learned that:**

- Layla "you get down and go outside! Firemen wear a coat, boots and hat to the fire!"
- Amyr "you go in the water or a pool! You need to watch out for sharks!"
- Andrew "calls a fire fighter! If there is a fire in your house, you need to get out! Safety!"
- Phong "firemen are good!"
- AJ "a firemen is always happy!".

**8 WEST STREET**

**City of Binghamton Fire Bureau  
Special Operations Response Units  
2010 Annual Report**

The Heavy Rescue and Hazardous Materials Units of the Binghamton Bureau of Fire continued to provide the City of Binghamton with the highest professional quality of emergency response in these fields. In order to stay current with modern trends and maintain critical skill levels, training was conducted on a daily basis. Members trained to safely mitigate emergencies in confined space rescue, explosive environments, hazardous materials, high and low angle rope rescue, elevator rescue, collapse rescue, vehicular extrication and water and ice rescue.

During the course of 2010, Eng 21-6/Haz-Mat 21 and Squad 21, which make up the Special Operations Unit, continued joint training exercises with the Broome County Hazardous Materials team. Monthly training sessions were held at various field sites including the Sullivan Training Center and where hazardous materials are stored or are in use in the daily work environment. Subjects of training included topics such as decontamination procedures, plugging, patching and leak control, fully encapsulating suits, foam/petroleum operations, using computers to aid in response and mitigation, response to terrorism events, as well as pre-planning tours of selected sites in the City where hazardous materials are present.

Squad 21 continued the tradition of top-notch technical rescue capabilities. The challenges that were faced this year include multiple elevator rescues, motor vehicle accidents with entrapment and search and rescue in both the Susquehanna and Chenango Rivers. We continue to provide confined space rescue services to Crowley's, Frito Lay and the Joint Sewage Treatment Plant on a contractual basis. Additionally, the Squad was able to locate all confined space rescue equipment in a new, portable container.

The entire Haz-Mat team was certified at the advanced haz-mat technician level through training in Binghamton that was paid for by a grant. This brings the team strength to 24 members. All companies in the City now have four-gas meters for haz-mat detection and thermal imaging cameras to assist in locating victims. Because of the availability of the gas detectors we now routinely check for the presence of CO at fire scenes, thus further protecting the health and safety of our firefighters. We also instituted a new procedure for response to residential natural gas calls in cooperation with NYSEG.

Assistant Chief Stephen Faughnan, Special Operations

# SECTION FOUR

# TRAINING DIVISION

JAMES M. SULLIVAN FIRE TRAINING FACILITY

1 BELDEN ST

## 2010 Fire Training Division Report

The past year proved to be another productive year at the James M. Sullivan Fire Training Facility. Besides carrying out necessary training, strides were made in Personal Protective Equipment (PPE), training facility upgrades and facilitating outside agencies.

Binghamton firefighters acquired a combined total of 16,459 in-service training hours. Included in these hours were the first refresher sessions for the EXO-Personal Escape System for all interior firefighters. The 40-hour Advanced Hazardous Materials Technician Class was completed by 17 members of our Hazardous Materials Team; bolstering needed skills to mitigate HazMat incidents while wearing fully encapsulating Level A suits. Some B.F.D. personnel attended a two-day Emergency Railroad Operations Class sponsored by Canadian Pacific Railway with other first responders from the region, hosted by Binghamton Fire Department at our James M. Sullivan Fire Training Facility . In a continual effort to meet federal mandates, the training division completed two tasks. One, hosted a National Incident Management System (NIMS), ICS-700,100, & 200 Train the Trainer Course (with 54 students from all over NYS); thus qualifying three instructors in the Binghamton Fire Bureau to instruct these classes. Two, became 100% NIMS training compliant by assuring all personnel were trained to their specified level and reported the same to FEMA.

Upon a request from City Hall, the Training Division agreed to help out the Department of Public Works (DPW, by providing Basic First Aid and CPR training to employees needing said training. Working over two months, 40 plus DPW employees were certified in CPR and Basic First Aid.

During the Spring semester, two Binghamton University Leadership Class groups shadowed the training division for two months and presented a report to their professor/class on the leadership techniques and styles used in the Binghamton Fire Department. This was the third year the Binghamton Fire Department has participated in the program with Binghamton University.

On February 22 at 1438 hours, Binghamton Fire Bureau took another step into the cyber- era by transmitting a continuous live audio feed of our radio frequency out into the wide world web. Anyone may now follow Binghamton Fire operations from anywhere on the planet with internet access at the following web address:  
<http://www.radioreference.com/apps/audio/?feedId=4060>.

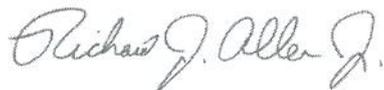

The training facility completed a lighting retrofit of the training facility providing better lighting with a significant reduction in energy use. The City received rebates from NYCERTA reducing the cost of the project by 70%.

Another responsibility of the training division is to manage the personal protective equipment quarter master program. In anticipation of the previous three-year turnout gear contract expiring, a yearlong wear trial of turn-out gear was undertaken. The extensive wear trial resulted in a new three year purchasing contract with Tyler Fire Equipment for Morning Pride/Ranger Gear. The new turn-out gear will provide more protection, mobility, and simplicity to the firefighters at a very reasonable cost.

Lastly, as 2010 came to a close, the training division was ramping up for a Recruit Firefighter Training Class set to begin in January 2011. This class is the direct result of a successful SAFER Grant awarded to the City of Binghamton Bureau of Fire by FEMA to hire eight new firefighters.

Some people may think of training as an auxiliary function of the fire service, yet training is the foundation of all firefighting skills and knowledge. It is this training that a firefighter must rely on at the most critical times. That is why we remind our firefighters to train as if their life depends on it... because it does!

Respectfully submitted,

## 2010 EMERGENCY MEDICAL SERVICE REPORT

It has been said that the only constant in life is change. The members of the Binghamton Fire Department have had to become experts with adapting to ever changing conditions and 2010 was no exception. The start of the New Year saw the permanent closure of Engine & EMS 6 located on West St. in the first ward. This cut forced many changes, but one thing stayed the same-the quality of care delivered by the Binghamton fire department.

***Multi-tasking.*** Our members assigned to work the fire ambulance became very familiar with this concept in 2010. In years past these members were strictly dedicated to the ambulance and would respond to fires to provide medical support only. Now we ask them to join the firefight if another ambulance is available to provide medical coverage at a fire scene. Two extra sets of hands on the fireground can have a tremendous impact on what is, and will always be, a labor intensive undertaking. The men and women of the BFD did not miss a beat and quickly adapted to the new change. Along the way they transported 3,198 patients to area hospitals- giving comfort and aid to the sick and injured and bringing in much needed revenue to the city's general fund.

***Training.*** The Binghamton Fire Department continued our long tradition of being one of the best trained agencies in all of New York. 2010 marked the first full year of instruction for our new basic emergency medical technician educator, Liz Mednansky. She brings a wealth of knowledge and enthusiasm and we are well served by her competent instruction. Every member received training in CPR and automatic external defibrillator use, as is our custom- going above and beyond the two year standard. We were very fortunate to have Capt. Moore from the Broome County Sheriffs Dept. come and lecture on gangs and their activities in our area. This new knowledge will certainly help our members stay safe in these uncertain times.

The Department was able to share its expertise with other city workers by hosting blood pressure screenings and teaching CPR. The screenings, held at city hall, enable city workers (and interested visitors) to learn what their blood pressure and pulse were and to receive information in the form of handouts to further understand what those numbers meant. Members from the training and EMS divisions also instructed city workers in CPR, AED use and advanced first aid so that they may better handle emergencies that they may encounter.

**Regulation.** All of our EMS activities are regulated by the NYS Dept. of Health, Bureau of EMS. We successfully passed two audits given to us in 2010. One examined our activities as a training center and the other closely audited all of our agency's files, equipment and personnel. I am proud to say that the department passed with flying colors and *no* deficiencies were noted.

**Equipment.** We make every effort to equip our members with the tools they need to do their job- saving lives. We took a big step forward in 2010 by equipping every vehicle in our department with life saving AED's. Now every fire truck and medic vehicle carries this amazing technology. A device called a Veinlite was obtained in an effort to help our Paramedics gain vascular access on pediatric and bariatric patients. Securing a patient's airway is always our first priority and it is especially critical in our pediatric patients. We purchased a device called the Airtraq which will help our Paramedics obtain and secure an airway in our smallest patients. An agency as busy as ours will need to purchase new ambulances quite frequently. This is due not only to the high call volume we face but also to the wear and tear these vehicles must endure. In the fall we began the process of designing and creating specifications for our first ever ambulance re-chassis. In its simplest terms we are recycling an old ambulance by placing its box on a new chassis. This not only saves the city money but it is also more environmentally friendly.

**Community events.** The department continued to provide EMS coverage to the community at various venues. We secured a contract with Broome County to provide EMS coverage for large events at the arena. We provided an ambulance to stand by at the Lee Barta 5K race. We handled all EMS duties at First Night

Binghamton. We oversaw EMS at the Chris Thater memorial races held in August at Recreation Park on the West Side. In addition we provided AED's, equipment and EMT's to a host of smaller community events. Our responders stood at the ready to help at these events and in several noteworthy instances were able to help some very sick and injured patients in their time of need.

Throughout this year of change the one constant that never wavered was the commitment of our members to providing the very best in emergency medical services. Always leading the way in equipment, training and dedication, they are an asset that our community can always depend on.
